

Wołomin, 15.05.2025

Dear Sirs,

In response to numerous inquiries regarding the TPO (Trimethylbenzoyl Diphenylphosphine Oxide) ingredient, we would like to inform you that in 2023 our company began the process of withdrawing the ingredient from the light-cured products and this ingredient is not present in currently sold products. In accordance with Regulation (EU) 2025/877 of May 12, 2025, the Trimethylbenzoyl Diphenylphosphine Oxide ingredient will be banned to use in cosmetics from September 1, 2025. At the same time, we would like to inform you that other ingredients of our products, including Ethyl Trimethylbenzoyl Phenylphosphinate and Bis-Trimethylbenzoyl Phenylphosphine Oxide, are substances different from TPO. Despite the similarity of their names, they differ in chemical structure and properties. They are not classified as CMR substances (carcinogenic, mutagenic or toxic to reproduction) and therefore, in accordance with Regulation (EU) 1223/2009 of 30 November 2009 on cosmetic products, they are allowed for use in cosmetics without restrictions.
